

NEW PRODUCT ANNOUNCEMENT SEPTEMBER 2022

TORONTO, ON - SEPTEMBER 15TH, 2022

Today NRS Brakes added **22 New Part Numbers** for 2017-2022 Tesla, Ford, GMC, Dodge, Mazda, Honda, Toyota, Nissan, Mitsubishi and Jeep vehicles, covering **10 Million Vehicles** in Galvanized Premium Brake Pads product line.

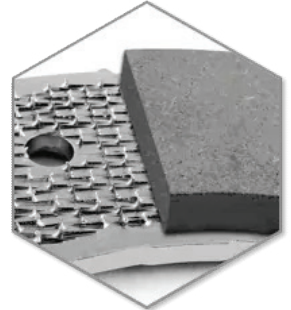

Kits also include Abutment Hardware and Caliper Piston Cushions where applicable.

Canadian made Premium Galvanized brake pads by NRS Brakes have a technology that you can see. Rust resistant, unpainted Galvanized Steel that incorporates an award winning, patented NRS friction attachment technology. The result are the world's quietest, safest and longest lasting brake pads. Galvanized Steel that outlasts the friction. Won't fail as a result of corrosion or friction material delamination from the backing plate, giving you more secure, safer stops.

NRS brake pads are made with galvanized steel with shark-like teeth that provide a mechanical retention of the friction material, overcoming inadequacies of adhesive usage. This guarantees that the friction material will never delaminate, providing a longer life and safer brake operation for the entire life of the pad.
