INFORMATION RELEASE

Two new Patents for NRS issued in Q1 2005, including first European Patent

NUCAP is pleased to announce its two newest patents for its NRS mechanical attachment technology.

Patent US 6843095 is NUCAP's fourth patent issued in the United States for NRS. This latest patent addresses further aspects of the tooling system and methodologies used within the NRS production process.

European Patent # No. 1155246 is NUCAP's first patent to be issued in Europe, providing NUCAP international protection of its intellectual property, and further validation for NRS' European licensees. The patent's official date of publishing will be April 20th, 2005.

These two newest patents will bring NUCAP's total number of issued NRS patents to seven, with issuing countries as per the listing below.

Patent #	Type	Description	Country	Owner	Filed By
6,843,095	NRS	Apparatus	US	Arbesman	Arbesman
6,431,331	NRS	Plate (Variant)	US	Arbesman	Arbesman
6,464,047	NRS	Plate	US	Arbesman	Arbesman
5,376,410	NRS	Method	US	Arbesman	MacKelvie
1,155,246	NRS	Plate, Method & Apparatus	Europe	Arbesman	Arbesman
1,330,521	NRS	Method	Can	Arbesman	MacKelvie
1,337,622	NRS	Tool	Can	Arbesman	MacKelvie

Please note that complete information on the patents is available online within each country's/region's Patent Registration web site. As well, we would be happy to review the status and contents of any of the patents listed above as required.
